ELEVATOR AT GAINFORD.

TO MAKE NIGHT DRIVING SAFE.

A white strip painted down the centre of the paved part of the highway, similar to the strips usually found at curves and hills, is suggested, by a newspaper in Eastern Canada as a desirable safety device for night driving. Those who have used a heavily traveled highway on a rainy night will appreciate what such markings would mean, because it is often difficult in the face of headlight glare to determine how far to the right a car may be safely steered. The opinion of a second editor, commenting on the proposed white strip down the centre, is that such a device would deprive the white line of its special warning significance where it already occurs at curves and hills. This paper believes that, if a white line were painted all along each side of the pavement, leaving the centre lines at hills and curves as they are, the driver would be afforded what he needs—a clear definition of his own side of the pavement.

On Sunday Next.

Four thousand German Canadians from all over Alberta are expected to be in attendance on Sunday next, in Edmonton, at the annual G.C.R. association's get-together picnic. The celebration includes an auto parade of decorated cars, music from a string or orchestra in Victoria park, and a sport club "Jahn."

The list of speakers includes W R Howson M.L.A., D M Duggan M.L.A. and A W Roeder, who will address the gathering in English; Prof Owen, Mr Theuner, and Mr Franke, who will speak in German.

Results in Grade Nine.

The results of the grade 9 exams will be made known this year thru the proper channel, the department of education. Heretofore these results were available thru the local board first, to be followed later by a notice from the Dept. of Education. It has now developed that some local school boards had been using, in this connection, the principal's confidential report, and which was contrary to the regulations of the department.

An announcement made by the department of education on Monday states that the results of the reading of the exam papers will be notified to the students by mail direct, as usual. Grade 12 results will be the first to go out, and will be ready toward the end of this week.

The exam. results in the other grades will follow a few days later.

Our Baseballers on Tour.

Stony Plain's Big Five ball team was entered in the baseball tournament held this week up at Pickardville, under the auspices of the athletic club there. The players were picked from the following members of the team:

Ph Sinner, Arkly Brass, Philip Enders, Ed Enders, Herb Wolfe, C Fuhr, R Graydon, R Armstead, W Roseau, C Brox, O Miller, L Miller, L Wudel, Mag Larson, C Loblich, C Lory, Carmichael and W Brox.

Duffield Doings.

The funeral of Mr Daniel McKaig, an old time resident of the Duffield District, and for a number of years a Court official, took place in Edmonton on Friday last. Deceased had been taken to the City for treatment, and had passed away there on Tues., July 29, in his 70th year. The funeral services were conducted by a Captain, the Rev G E Reynolds, and interment was made in the Edmonton Cemetery. A number of his old friends from the Duffield District were present at the services, to pay their last respects to deceased.

Nature's Laws

In these days much is said and written on the subject of planning—farm planning, industrial planning, social planning, financial planning. Economists, both those who have made a life study of economic principles, trends and problems, and those who assume to speak on economics but have only a superficial knowledge of the subject, are talking and writing on the subject of planning. Governments the world over are engaged with the subject, and world conferences are wrestling with it. As a result, people are confused with the multiplicity of ideas advanced, and in the majority of cases, one set of ideas is contradicted by another set.

However, out of the confusion, there has come the suggestion that nations everywhere should reverse the process they have been following of increasing and expanding production and proceed to curtail production. So, we are told, farmers should reduce the acreage they are planting to wheat and cotton and coffee; miners should mine less copper, iron, silver, zinc and tin; smaller quantities of oil should be pumped from the bowels of the earth; fewer fish should be caught; less timber cut; smaller quantities of manufactured articles turned out.

The suggestion is an absurd one. The population of the world is steadily, even rapidly, increasing, and people want more of everything, not less. Why then produce less to meet their needs? The problem that calls for solution is not that there is too much wheat in the world, or that too much of it is being produced annually, but that certain countries for purely national reasons are denying to the people the right to import wheat and in so doing are denying to them the privilege of cheap bread. And what applies to wheat, applies in varying degrees to all other products and commodities.

Nature with her immutable and inexorable laws has a way of controlling production. In this year of 1933 when the story of huge wheat surpluses is heard on every hand, Nature stepped in and reduced the wheat crop of the United States by two hundred million bushels, and struck tens of millions of bushels off the Canadian crop; and reduced the yield in other countries. Drouth, and hail, and grasshoppers, and other insect pests all took their toll, and as a result the world will not produce more wheat than its inhabitants require.

Suppose the acreage sown to wheat, for example, was arbitrarily curtailed by order of governments. Farmers would be obliged to summerfallow the land not needed to prevent it becoming infested with weeds. It will be acknowledged that the more carefully and intensively the land is worked and cultivated, the greater the production per acre. Consequently, the almost certain result would be that larger average yields would be obtained, and the reduced acreage in crop would be offset to a considerable extent by the heavier yields. Therefore, even assuming that less wheat should be produced, reduction in acreage sown might not solve the problem. It may be admitted that there would be an economic saving to the farmer in increasing his yield per acre and sowing fewer acres. Possibly farmers should have followed this practice in the past, and should do so in the future, but not with the object of raising less wheat, but better wheat and more of it per acre at less cost to himself.

And if man decided in his wisdom, or lack of it, to greatly reduce the production of wheat in any one year, Nature might likewise in that year enforce certain of her laws to bring about a reduction, with the result that men might easily find himself in dire need. Or Nature might offset the puny efforts of man and order climatic and other conditions which would more than offset all man's efforts to lessen production.

Man stands impotent when drouth comes and day follows day without rain; he is powerless when hail lashes his grain crops to the ground; he can wage but a futile battle when grasshoppers and other pests swarm over the land; he can do nothing if a blighting frost destroys. But Nature has her own ways and methods of control. When grasshoppers increase, a parasite develops which ultimately destroys the hoppers; when rabbits become unduly numerous, disease takes them off. Man may wage war against this or that, he may plan and seek to control, but in the final analysis Nature directs and controls.

There are men who in this day and generation propose to plan and control practically everything, who declare that old laws of supply and demand, of the survival of the fittest, are obsolete, and should be ignored, or overcome. These things, they say, are merely the laws of the jungle, which should have no place in our modern civilization. But the laws of the jungle are Nature's laws. In the jungle Nature rules supreme, and it is a jungle because no attempt is made to interfere with Nature.

Man may, and can, and does control some of the powers of Nature. Working with Nature he can bring about many improvements, and may even control Nature in some of its aspects and workings. But with many of Nature's laws and workings, man can exercise no control whatever. He cannot lengthen or shorten the seasons, he cannot determine the weather, he cannot order the earth to bring forth bountiful crops this year and less than normal crops next year. And he better not try to do it.

The real trouble with the world today is that man has tried to control Nature's law of supply and demand by setting up an intricate network of man-made restrictions, obstructions, barriers, prohibitions, which interfere with the natural working of that law. As a result man has put himself into a huge spider's web of his own making in which he is struggling in futile fashion. He can only free himself, not by a further defiance of and interference with Nature, but by destroying the web he has woven to his own undoing.

Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharge checked before they become serious.

To check these unnatural discharges there is a remedy in Dr. Fowles' Extract of Wild Strawberry, a remedy that has been on the market for the past 88 years. It is rapid, reliable and effective in its action. A few doses is generally all that is required to give relief. Get it at your drug or general store; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Canada's Taxed Property

Total Taxable Real Estate Is Assessed At Eight Billion
The total taxable real estate in Canada was assessed at \$8,222,260,000, according to reports received by the Dominion Bureau of Statistics, for the year 1932.

Another \$1,500,000,000 of assessed property was exempt from taxation, consisting chiefly of Dominion, provincial and municipal property, and educational, charitable, and religious institutions.

Quebec led with \$705,708,000 exempted property. Ontario, \$336,336,000. Manitoba, \$156,794,000. British Columbia, \$149,275,000; Nova Scotia, \$48,119,000. Prince Edward Island, \$1,828,000. The returns from New Brunswick, Saskatchewan and Alberta do not show the amount of the non-taxable property.

The total taxable valuations in Canada were \$8,722,110,000, of which Ontario had \$3,183,152,000; Quebec, \$2,223,470,000; Saskatchewan, \$1,134,461,000; British Columbia, \$688,096,000; Alberta, \$395,745,000; Manitoba, \$357,103,000; Nova Scotia, \$177,218,000; New Brunswick, \$153,585,000; Prince Edward Island, \$39,302,000.

Taxable real property, amounting to \$8,222,260,000, was distributed as follows: Ontario, \$2,811,763,000; Quebec, \$2,210,943,000; Saskatchewan, \$1,089,729,000; British Columbia, \$688,096,000; Alberta, \$379,960,000; Manitoba, \$339,012,000; Nova Scotia, \$140,107,000; New Brunswick, \$130,053,000; Prince Edward Island, \$32,996,000.

Change Hardly Noticeable

American Inch Unit Now Two-Millionths Less In Length

The American inch unit of measurement has lost two-millionths of its former length in order that precise measuring in the United States and England may be done on the same basis. The new definition of the inch is now 25.4 millimetres—a difference of about one-eighth inch in a mile as compared with the former American standard. This minute alteration was made necessary by the precision manufacturing and the confusion arising from varying standards in the two countries. Gauge blocks now are made correct to within one-millionth of an inch. Both the United States bureau of standards and the national physical laboratory of England will certify industrial gauges on the new basis.

Looking For Sandy Beaches

Stefansson Scetical and Mounties Are Going To Search Arctic

Seeking sandy beaches under icebergs will be part of the R.C.M.P.'s arctic patrol work the next two years, for as the "Nascopie" sailed recently bearing aboard "Mounties" to be stationed in the polar regions of Canada for the next two years, they had instructions to look for sandy beaches. The night before last the "Nascopie" sailed, Vilhjalmur Stefansson, famous explorer, wired Gen. T. H. MacBrien, commissioner of the R.C.M.P., asking him to enlist the co-operation of the red-coats, in searching for sandy beaches under the ice. The wire stated that Stefansson had never recalled having seen one, and he wanted to confirm his own experience.

Rewarded For Kindness

Welsh Girl Receives Legacy For Helping Old Lady

An old lady of Swansea who lost her money while travelling fifteen months ago met a girl at Cardiff Railway Station and told her of her difficulty. The girl lent her 10s. The money was returned by post shortly afterward.

A few days ago the girl, Miss Jean Davies, a pretty brunette, engaged as a shop assistant at a hair-dresser's in Pontypridd and living at Senghennydd, received a solicitor's letter. The latter informed Miss Davies that the old lady had died and left her £3,000.

London Police Versatile

London policemen, who already must have a practical knowledge of first aid, car driving, swimming and life saving, are now to be trained as firemen, so that they may be equal to the task of rescuing persons from burning buildings.

Professor Raps Modern

Method Of Education

Says Students' Mind Clogged With Dead Matter

Modern methods of education clogs the mind and as the result modern young people are class conscious, really ignorant, selfish and arrogant, their minds filled with dead matter.

This slashing attack on modern methods of education was made by Dr. William Oliver, professor of the School of Organization and Industry at Edinburgh University, Scotland, in an address at the annual conference of the textile industry held in Harrogate, England.

"Modern education tends," Dr. Oliver said, "to hinder mental development by clogging the mind with dead matter. Education has become too pedantic, and in consequence distrust has arisen between men interested in education and men interested in industry."

"The idea that education should relieve its recipients of manual labor was prevalent, and it has been strengthened by the evolution of staff appointments meaningly dealing with clerical duties. Manufacturers were largely to blame for appointing their managers from the office, rather than from the machine."

"It is distinctly unfortunate that much of the present day educational procedure is developing a class of young people who do not wish to work in factories, or indeed to work at all. Many 'liberally educated' young people are really ignorant, selfish and arrogant."

"Wherever a man gets above the dead level of bare subsistence he becomes obsessed with the idea that his family should have an easier time than he has had. He fails to see that his hard work has been the essential factor in any success he has achieved."

Aquarium That Is Different

Queer Fish Kept In Refrigeration Rooms At Port Of Seattle

In a frozen aquarium, believed by officials to be the only one of its kind, strange fish from many waters stare stonily at thousands of visitors at Seattle every year. The aquarium was not planned, it just grew, Harry E. Larson, of the port of Seattle, explains, until it is becoming world famous. One day a fisherman brought in a strange fish and wanted to hang it up in the refrigeration rooms. Then another caught a different variety, rare in these waters. So it grew until there is now a collection which has attracted as many as 1,500 visitors to the plant in a single day. They brave a temperature of ten degrees below freezing to walk through the corridor lined with ice-encased rarities of the deep.

For Safer Flying

Device Lands Passengers Safely From Disabled Plane

A device which ejects passengers from disabled cabin aeroplanes and lowers them safely to the ground with parachutes was demonstrated successfully at Roosevelt Field, New York, before a group of air line officials and prominent aviators.

At 150 feet, lower than is considered safe for a parachute jump, eight dummies were dropped successfully from a test plane then two parachute jumpers were dropped from 1,500 feet.

Proves Value Of Advertising

Reading Newspaper Ads Often Creates Desire To Shop

The value of newspaper advertising to shoppers and advertisers alike was shown at St. Louis, Montana, in a survey conducted by advertising students of local vocational schools. Of those interviewed, 1,380 out of 1,545 said they generally read newspaper advertising before planning a shopping trip, while 1,322 out of the total interviewed said newspaper advertising often created a desire to go shopping when there had been no plans to go.

About the first thing a physician does is to examine the patient's tongue—probably to see if it will tell what he is worth.

Loaned Money On Plane

Kansas City Pawnbroker Kept Promise To Take Anything

Ben Hurst, Kansas City, Montana, who advertises the "largest pawn shop west of the Mississippi," and who boasts that he has never refused a loan on anything that had a tangible value, was in a quandary recently.

Willard Herman, Oregon, Mo., wrote Hurst that he needed \$250 and had a good aeroplane he could put up as security.

Hurst thought the whole thing over, decided he could rent a hangar to keep the aeroplane in and told Herman, by mail, to come get his money.

Test Was Satisfactory

First test of the Dymaxon car, three-wheeled automobile built on the stream-lined principle of fast boats, was held at Bridgeport, Connecticut, before 3,000 spectators. With its inventor and designer, Buckminster Fuller at the wheel, the automobile attained a speed of 70 miles an hour over the one-third mile cement test road at Seaside Park.

Better Distribution Needed Rather Than Restricted Acreage When Many Are Lacking Food

"As long as so many people in the world are starving, there is no sense in reducing acreage," Neil S. Beaton, president of the Scottish Co-Operative Wholesale Society considers. "The right thing is to raise the standard of living of the people so that they can consume naturally bountiful instead of restricting it. The world has succeeded in production, it must apply itself to distribution. That is the main object of the consumers' co-operative movement," he declared.

Members of the delegation from the Scottish Society, discussing the question at Saskatoon, did not consider that the maximum possible consumption of bread had been reached. In Scotland when potatoes were cheap the consumption of bread fell to rise again when there was any potato shortage, one of the delegates pointed out.

The representatives of the society visiting the west were: Mr. Beaton, Alexander Buchanan, a director, and William Smith, grain buyer and manager of flour mills. They were inspecting the property of the society in Saskatchewan which includes nine grain elevators. They later attended the wheat conference at Regina and the conference of the Co-Operative Union also held there during the time of the World's Grain Show.

The Co-Operative movement in Scotland had more than held its own during the depression said Mr. Beaton answering a question. The sales of the Wholesale Society had remained steady at about 16,000,000 pounds for the past four years, but at the lowered prices this involved a considerable increase in bulk of goods.

The wholesale organization was employing more people than before the depression, at the end of 1932 there were 10,587 employees, an increase of 200 over the previous year. The 250 retail societies had 774,778 members and as these were usually heads of families they represented the majority of the four and a half million people of Scotland. They had 20,000,000 pounds in share and loan capital in the society.

It was intended to open shortly a hosiery factory at Fifehead in Fife-shire costing 100,000 pounds. Other new ventures were a creamery at Kilmarnock and extensions to grocery warehouses at Glasgow and Dundee and to the fish curing station at Aberdeen.

People Turn To Religion

Statistics Show Church Membership Increases In Hard Times

That religious fervor is a corollary of hard times is well known and confirmed by the annual statistical report of the Christian Herald, showing church enrollment increased 929,252 in a single year. While one out of every six banks was wiped out, one out of every 45 hospitals forced to close, one out of every 22 business and industrial institutions forced into bankruptcy, only one of every 2,344 churches suspended during the depression, according to the Herald. Newspapers seem alive to the interest in the religious field. The managing editor of the New York Sun says that a religious pictorial feature, four-column reproductions of famous etchings depicting thrilling episodes in the Book of Books, has brought in an unusual volume of favorable comment.—Editor and Publisher, New York.

Youngest Woman Barrister

Miss Yvonne Stranger, aged 21, who has just been called to the bar of the Middle Temple, London, is the youngest woman barrister in the United Kingdom. She passed her examination some time ago, but had to wait until she became of age before being called.

Sheep In New Zealand

New Zealand has more than 280 sheep to the square mile, and over 20 to every man, woman and child in the Dominion, according to a recent census. New Zealand is boasting that the large sheep increase is because the country has no droughts.

W. N. U. 2005

Sheriff's Dream Came True

Stolen Eggs Hidden In Church Just As He Saw Them

Sheriff George Barham sat, in his office at Bloomfield, Montana, his feet on his desk, and went to sleep. He dreamed he saw someone enter the Methodist Church at Advance, a nearby town, with a basket of eggs. Then the sheriff woke up.

The dream made such an impression on him that he called the marshal at Advance and the Rev. J. L. Galloway, pastor of the church. He asked them to go to the church and see if everything was all right. In the attic they found six cases of eggs, which had been stolen from a poultry house.

By Ruth Rogers

PARIS IS MAKING A POINT OF WIDENING SHOULDERS IN JACKET SUITS

The suit costume is of chief interest for daytime wear. And isn't this model tremendously good looking?

It is a conservative novelty checked pattern in light navy blue woolen. The coral-red crepe silk bodice of the dress, lends an extremely light touch. Note the sporty scarf neckline. The skirt attached to the bodice in a slimming fashion, is gently shaped.

Beetles woolen, this style is suitable for crepe silk. And it is stunning in a small patterned blue crepe in red and white. Make the blouse of plain white crepe silk.

It's easily put together. The saving in cost is well worth the small time it will take you to make it.

Style No. 734 is designed for sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust.

Size 16 requires 4 1/2 yards 39-inch 3/4 yards 54-inch with 1 1/2 yards 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Permits Rest With Mounties

People Wanting To Carry Firearms Have To Prove Claims

Canada has been tightening up on its law regarding the carrying of revolvers. A law enacted at the recent session of Parliament makes it more difficult for a resident legally to possess a pistol or revolver, stiffens the penalty for illegal possession of such a weapon, and so is expected to have an important effect in the unending war on crime. In the past revolvers might be carried by private citizens who held permits issued by police authorities. Permits supposedly were issued only for the protection of life and property, but there was uniformity about the interpretation of circumstances which might justify their issuance. The number of permits in most cities never was large and Ottawa, for instance, with 125,000 people, had no more than a dozen or so—held in the main by bank messengers.

In order to tighten the regulations, and to make it still more difficult for revolvers to fall into possession of desperate characters, parliament has enacted that for the future permits to carry revolvers will be issued only by the Royal Canadian Mounted Police and by provincial police authorities. Magistrates and municipal police are denied further rights in the matter.

All permits in existence were automatically cancelled as from July 15, and their holders must prove their claims anew before a broader tribunal.

Any person found in possession of a revolver for which he has no legal license is liable to five years in the penitentiary. — Regina (Evening) Leader-Post.

Hudson Bay Fish

One Thousand Pounds Of Herring Shipped Weekly From Churchill

There is no doubt that commercial fishing may be carried out with success in the Churchill region providing freight rates are reasonable, and there is a fair price on the prairie, according to Tom Riddoch, trading post operator who is acting as agent for buyers in the south.

"We are shipping more than 1,000 pounds of fresh sea herring to The Pas, Saskatoon and Winnipeg, every week," said Mr. Riddoch. "We can fill all orders. The fish are caught by trappers living here, and are secured just prior to the departure of the trains so they will be in an excellent condition on arriving in the cities."

"The freight rates are now such as to encourage business. We have a rate of \$1.50 to The Pas by freight, and this has helped a lot. If a further reduction were made, I'm sure we could increase the business."

"With the next high tide, we should be getting salmon trout, a real tasty fish which will make a hit on the prairies."

Ten thousand skiffs and 1,000 motor boats are for hire on the River Thames, in England.

Work on farms is reducing unemployment in the Irish Free State.

Exhibit Of Canadian Paintings Now Being Shown In Britain Has Achieved Popular Acclaim

Japanese Keep Old Festival

Believed To Have Come From China

Festival of the Seventh Eve of the Month—The Tanabata Matsuri (the festival of Tanabata)—was observed by children at some primary schools in Tokyo and suburbs recently. They were celebrating the Seventh Eve of the Seventh Month, when the Weaver Princess Star (Star Vega) is supposed to meet the Herdboy Star (Star Altair) in the sky once a year on the banks of the Milky Way.

Virtually all but the memory of the festival had disappeared in the cities until a few years ago, when it was revived. The festival is essentially a children's affair and used to be observed in the homes.

Tall bamboo trees erected on the school playgrounds were a feature, with their branches hung with daintily cut papers of varied sizes and colors, bearing short poems. They sing beautiful thoughts and sentiment in praise of the sky princess, the sky herdsman, the Milky Way, the Seventh Eve love-making, and all the wonder and mystery of the heavenly elements.

The festival is said to have come from China during the reign of the Emperor Koken (756-762 A.D.) and already had become fashionable in the 8th century. It was essentially of religious significance when it first came to Japan, but has become an affair of literary interest as it has been interwoven into the life of the Japanese people.

Value Of Farm Land

Like Everything Else Worth Only What It Can Earn

What is good farm land worth? An Englishman stated not long ago that the best land in England, where the average production per acre of all crops is much higher than in Canada, the market is at the door, the growing season is longer and the climate generally more favorable, can be bought for \$100 or less per acre when it can be bought at all. With an experience of two thousand years behind them, English farmers are pretty likely to know what values are. We doubt whether any land in Canada can earn interest on a very much higher valuation than that, except in a very few highly favored spots, and then only by intensive cultivation of high-priced perishable fruits and garden truck.

One of the principal causes of much of the present trouble of farmers is that they paid, or promised to pay, more for their land than it was worth and their mortgages represent more than the actual value. Land, like anything else, is worth only what it can earn.

Paris police have been equipped with fountain pens which eject tear gas.

WHAT'S IN A NAME?—PLENTY!

When Norma Shearer, famous Canadian film star, returned to New York from Europe she was besieged by members of the crew for her autograph. Here is the screen actress obligingly signing for an admiring sailor film fan.

The show of Canadian water colors now touring Great Britain, has now achieved remarkable results. The stimulus provided by the exhibition in Great Britain comes mostly from press comments and purchases. Among the interesting statements are those of O. D. Skelton, parliamentary secretary of state for Scotland, who says they show the Dominion "is on the high road to developing a national school of art of its own. Dignity was found in the pictures, along with brilliance of color, breadth of view, and a large and solid quality in the best of them which perhaps could not be found so easily in an island school of painting. We realize at once these pictures came from the heart of a great country."

"The majority of the Canadian artists," says the Glasgow Evening Herald, "have departed from the traditional use of the medium, depending on bold contrast and emphatic delineation of form to secure effects."

"It is high time that we saw what artists in other parts of the empire are doing," says the Glasgow Evening Times, "if they are painting with the same imagination, and have developed as vigorous a technique as these Canadians. They have at their disposal scenery on a scale unknown to Britain. But few of them are content to reproduce the ready-made pictures of their far-flung countryside, of their towering mountains, or their vast lakes. Most of them avoid facile naturalism. They see their landscape pervaded by a spiritual quality and they interpret this in terms of arresting design and decorative color."

"The Canadian painters are not afraid to use water color in broad, sweeping terms," states the Edinburgh Dispatch. "The result is some very clean-cut paintings, brightly colored, and exhibiting a distinct individuality which compares favorably with many admirable works in the other galleries."

"Peter Haworth's Rocks—Nova Scotia has a startling, clean-cut attraction, a coast scene made remarkable through firm treatment and confident draftsmanship," states Robert Turner, the critic. "The almost architectural character of some rock scenery can materially aid the painter in composing his picture, more especially in giving an expression of massive solidity, and Peter Haworth has exploited this means fully. We realize when looking at this work, hungry for drawing, how much the labored sentimental pictures of foam-sprayed cliffs that we see dotted in our public galleries are the exact antithesis to this typically virile Canadian painting. William Ogilvie is the most advanced artist in the Canadian group. Canadian pictures on the whole are frankly representative of land or seascapes, but Ogilvie makes use of symbolism, as in his 'Morning Sun' and 'Rhythm'."

Seagull Brought Companions

About Three Hundred Visit Utah Woman Every Day

Mrs. Bayard Chambers, of Salt Lake City, Utah, fed a lone seagull several years ago and, as a result, now feeds approximately 300 daily.

"The bird was tired and hungry when Mrs. Chambers fed it. Return trips were made, with companion birds appearing in ever-increasing numbers."

Seagulls in Utah are virtually fearless due to a rigidly-enforced state law making their destruction a serious crime.

Sounded Like One

A man from Montreal was peering into the depths of the Grand Canyon. "You know," asked the guide, "that it took millions of years to get this great abyss to be carved cut?"

The man from Montreal was tremendously impressed. "You don't tell me," he continued. "Why, I didn't know it was a government job."

Automobiles and motor boats are being traded in on aeroplanes in London, England.

WORLD HAPPENINGS BRIEFLY TOLD

Max von Schilling, an outstanding figure in German music for nearly 40 years, is dead. He was 65 years old.

Australia has made large shipments of gold to London in the last few months.

Profits of the South Manchuria Railway have greatly increased during Japanese occupation.

Judge Cluer, British jurist is demanding that Holloway prison be made less comfortable.

Study of accounting and auditing methods that prevail in the western provinces is to be made by three officials of the Ontario Government.

Thousands turned out to welcome Lord and Lady Beatrix on the occasion of their first visit to Cape Breton Island.

Motor cars exported from Great Britain this year exceed in value the first shipped last year by almost 100 per cent.

The first load of wheat, offered to a Brantford, Ontario, mill from the 1933 crop, brought 75 cents a bushel, compared with 40 cents for the first load last year.

Flood, drought, famine and heat and plagues of cholera, locusts and rats are variously reported in widely separated parts of China, causing suffering and death.

Robert Brooks Harris, 74, founder of the Hamilton Herald, died at his home recently. With his brother, the late J. M. Harris, he started the Herald in 1899. Mr. Harris retired from the business some years ago.

Miss Anna Blair Thornton, daughter of the late Sir Henry Thornton, formerly president of the Canadian National Railway, was recently married to Dr. Winston F. Harrison, of New York and Montreal.

A brisk demand exists in Great Britain for cattle from the Canadian west, and that should be a big factor in making the first livestock shipment via the port of Churchill a success, stated Col. H. A. Mullis, M.R. for Marquette.

Men, women and children on unemployment relief allowances in British Columbia have been reduced from a peak of 129,000 in March to 100,000 at the present time. The government expects a further decline during the summer months, but is not so optimistic about the late fall and winter.

Age Is No Handicap

Eighty-Two-Year-Old Woman Keeps Active Control Of Brewery

Said to be the first and only brewery president in the country, 82-year-old Mrs. Jacob Hornung is directing the production of her Philadelphia brewery.

When her husband died eight years ago she decided that she would take charge of the plant, but it was no time making near beer. Then, with the advent of real beer, she found herself in the midst of humming activity.

Some of her friends say she is 86, others that she is 82, but she insists she feels 16.

She is at her desk in the brewery every day and some mornings she arrives at 7 o'clock to see "who comes late."

Should Advertise In Canada

If British goods, even with a tariff preference, are to find a proper market in Canada they will have to be advertised here. Canada is undertaking an advertising campaign in Britain and if the full benefits are to be reaped from the Ottawa agreements a similar campaign should be carried on in this country on behalf of United Kingdom and other Empire goods.

Was New Once

Shenfield, England, decided to climax its recent progress and "beautify" campaign by having an up-to-date mail box in the post office. An appeal to the government brought prompt action and a "new" box was installed. Inspection has revealed the letters "V.R." on the box, showing that it had been made in the time of Queen Victoria.

Households have been placed in Chile as a prime necessity and under government control.

Founding Of Cunard Line

First Regular Steamship Service To Cross the Atlantic

Americans the world over are particularly interested in the birthday of the Cunard Line, founder of the first regular steamship service across the Atlantic, first because the anniversary of July 4th happened to coincide with their own Independence Day, and secondly because the birth and growth of the steamship has played a major part in the development of America.

When the Cunard flag-ship "Aquitania" sailed into Halifax on a short cruise from New York, her arrival marked the ninety-third anniversary of the maiden voyage of the pioneer Cunard "Britannia" from Liverpool to America. From that time the history of the Line has been to a large extent the history of transatlantic shipping. The "Britannia" left Liverpool on July 4th, 1840, bound for Halifax and Boston and covering the route in 14 days and 8 hours carrying 53 passengers.

She inaugurated the first regular steamship service across the Atlantic. Little is known of that first historic voyage except that it was successfully completed and when the "Britannia" bearing her builder, Samuel Cunard, arrived at Halifax and Boston, he was received with the wildest enthusiasm which expressed itself in hundreds of invitations to dinner, and the presentation of a marvelous silver loving-cup by the merchants of Boston, commemorating the achievement.

Few Canadians realize that Sir Samuel Cunard was born in Halifax and even before founding the Line which bears his name, had by the year 1830 amassed a huge fortune and was head of a fleet of sailing ships plying between Nova Scotia and the West Indies. Knighted in 1859 for outstanding service during the Crimean War, he died in London in 1864, in his 78th year, one of the world's great pioneers.

Cunard came of a United Empire Loyalist family and was one of the leading men in Nova Scotia for many years. The name of his family is still carried on in various parts of the Maritimes.

From the early days of the first fleet of four little steamers, the "Britannia," "Acadia," "Columbia," "Caladonia," the story of the Line as told in "Spanning the Atlantic" by F. Lawrence Babcock, is a fascinating one. Many celebrated passengers have crossed in famous Cunarders, including no less a personage than Mark Twain. The name of the ship which is crossing in those early days is given in a letter he wrote to the "Acadian Recorder" of Halifax, and in his "Innocents Abroad."

It is interesting to know that the Cunard Line was the first to obtain a monopoly in carrying British mails to America; to adopt new inventions in hull and engine construction; to provide comfortable quarters for steerage passengers; to communicate by wireless from boat to land and to initiate in recent years the popular "tourist" class.

The story of the race for time across the Atlantic is one which has epic quality. Many competitors arose and fell and in the late years of the nineteenth century the race was fast and furious. As early as 1856 the "Persia" made the crossing in nine days while ten years later the "Sgo" crossed in 8 days. In 1877 the "Umbria" and the "Etruria" crossed in six days, while in 1894 the speedy "Lucania" reduced the crossing to five days. In this century the celebrated "Mauretania" has raced across the Atlantic consistently in less than 4½ days and even today is the fastest cruise liner afloat. For 22 years she held the mythical "Blue Ribband" of the Atlantic, the longest period any ship has ever worn this honour.

Cunarders have figured in several crises of Empire. Sir Samuel was knighted for the services his ships gave Britain during the Crimean War, while the fleet also served during subsequent troubles and the Boer War; a war service which culminated in the magnificent record during the World War. The present Atlantic fleet of the Cunard and Associated Lines, numbers twenty-two, from the giant "Berenangia" and "Aquitania" to the post-war "A" steamers on the Canadian route.

Making Youths Sea-Minded

Annual Task Which German Chancellor Has Set Himself

Making the younger German generations "sea-minded" is one of the multiple tasks which Chancellor Adolf Hitler has set himself. While he has not yet gone as far as the ex-kaiser with his famous phrase: "Our future lies on the water," which so aroused the British prior to 1914, he and his propaganda minister, Dr. Josef Goebbels, are losing no opportunity to bring the German navy before the eyes of the masses.

The world's most densely populated land is Java.

Winnipeg Newspaper Union

By Ruth Rogers

AN EXCITING SMART LITTLE DRESS

So young in mood. She'll love it! Well I guess! It has all the newest features, besides the smart fabrics that fashion it. Navy blue crinkly crepe silk inspired the original. The sleeves, collar and the help marvelously in creating an unusual effect in carrot-crepe overlaid in blue.

Note the wrapped arrangement of the bodice and interesting skirt treatment.

It's easily made and at an unbelievably small cost.

Grey crepe jumper is just the cutest idea ever with yellow and white checked gingham lining.

Style No. 905 is designed in sizes 11, 12, 15 and 17 years.

Size 15 requires 2½ yards of 39-inch material for blouse and 2 yards of 39-inch material for blouse, and ¼ yard of 35-inch lining.

Price of pattern 2 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Dirigible Coming Again

Graf Zeppelin Making Trips To New York In October

The dirigible Graf Zeppelin will make another flight to New York via South America in October if present plans materialize, Dr. Hugo Eckener said.

"Negotiations for the flight have not been completed yet," Dr. Eckener said. "It will be a passenger and mail flight, like our last trip to New York. We will follow our regular course from Friedrichshafen to Pernambuco and then go northward to New York."

The Graf Zeppelin thus far has made 320 flights with a total of 8,000 flying hours. It has transported 8,200 passengers, 32,000 pounds of mail and 47,000 pounds of freight and covered about 400,000 miles. Included in these flights are about ten round trips to North and South America, of which three were made this year.

Not Much Change

Away back in 1665 Abraham Cowley, of England wrote:

"Gold beguile in brethren hate;
"Gold in families debate;
"Gold does friendships separate;
"Gold does civil wars create."

The old world hasn't changed so much in some of its troubles—Winnipeg Tribune.

SUNDAY SCHOOL LESSON

AUGUST 6

RUTH

Golden Text: "Let us love one another; for love is of God."—1 John 4:7.

Lesson: The Book of Ruth, Chapter 1:1-5. Devotional Reading: Psalm 143:8.

Explanations and Comments

Naomi and Her Family In Moab, Chapter 1:1-5.—During a severe famine in the time of the Judges, Naomi and her husband and two sons left Bethlehem and settled in Moab. There Elimelech, the husband, died. The sons married daughters of Moab, Orpah and Ruth. After a few years' sojourn in Moab, both sons died; Naomi was the sole survivor of her family; her daughters-in-law were to her foreigners. She determined to return alone to Bethlehem, for she heard that the famine there was over.

At the Parting Of The Ways, Chapter 1:7-14.—In eastern lands fowls seldom take place in the home, and Ruth and Orpah carried out the usual custom when they accompanied Naomi a short distance on her way. When Naomi thought they had gone far enough to show her fitting respect she stopped to dismiss them. She bade each return to her own home, and Ruth determined to stay with Naomi. "Jehovah deal kindly with you, as ye have dealt with the dead, and with me," thus she voiced her realization of their devotion to her and her sons. She kissed them farewell and the two daughters-in-law returned. Naomi, however, was determined to return with her, she reminded them that they could not hope to secure husbands in her land. Orpah yielded, and turned back.

"In our desire to honor the courage and charm of Ruth's devotion, we moderns are apt to do some injustice to Orpah. Poor Orpah is often contrasted with Ruth, as though she were a Goneril or Regan beside a Cordelia. It is not so. Orpah was not a cold-hearted creature, with more prudence than affection in her nature. In returning to her native land and refusing to be a burden to the old woman, she acted according to Oriental standards, wisely, and even—admittedly—fell in a true spirit of kindness. She had nothing to reproach herself with, and her mother-in-law had no cause to feel disappointed. Both Orpah and Ruth were kind folk as well as kinfolk to Naomi."

Ruth's Noble Devotion, Chapter 1:15-18.—Naomi tried to persuade Ruth to return also, but Ruth was steadfast in her determination to remain with Naomi. Her words to Naomi have become famous: "Entreat me not to turn back to return from following after thee; for whither thou goest, I will go; and where thou lodgest, I will lodge; for thy people shall be my people, and thy God my God."

"Large is the life that flows for others' sakes; Expends its best, its noblest effort makes; Rewards the man and makes him whole; Love is the measure of the human soul."—James Euckham.

Plenty Of Playgrounds

Canada has Eighteen National Parks Covering 11,500,000 Acres

The recent official opening of Riding Mountain National Park, in Manitoba near Neepawa, adds 1,148 square miles to the area reserved in the Dominion as a natural playground for all the people. There are now eighteen of these national parks throughout Canada, with a total area of 18,000 square miles or more than 11,500,000 acres. They are sanctuaries for wild life, refuges from the hustle and bustle of affairs, and as the population grows they will be appreciated more and more by those periodically overwhelmed by a desire to "get away from it all."

Riding Mountain Park is 178 miles from Winnipeg and may be reached by good roads from the international highway into an encounter with the wild, mossy, dark, black bear and beaver. It has a herd of 2,000 to 3,000 wild elk, probably the largest in Canada. There are golf, tennis, swimming and boating, and for those who want the forest primeval trails likely to bring one into an encounter with the roaring elk. These ought to be enough qualifications for any one park.

Eighteen national parks offer eighteen magnificent vacations in infinite variety for the tired worker who craves the open spaces. In a few of these, as Banff and Jasper, he may dress for dinner if his inclinations move him that way, but for the most part they are handed over to the people pretty much as Nature left them.—Ottawa Journal.

It is indeed a poor man who says money is his best friend.

Saskatchewan Natural Gas

Drilling Commences In Dirt Hills Area Of Province

After \$40,000 had been spent in testing the structure, Highwood Sarcee Oil Limited, of Calgary, has pushed forward immediate plans for drilling for natural gas in the Dirt Hills. The company has secured controlling interest in 14,000 acres approximately 30 miles south of Moose Jaw and 50 miles southwest of Regina.

A contract for drilling the first well has been given to the Sheldon Burden of Canada Limited, work has already commenced and actual drilling operations started.

The company is equipped and prepared to go to 4,000 feet if necessary but it is anticipated gas bearing strata will be reached long before that depth. The area has been tested geologically and geophysically and last year a thorough survey by the latest seismographic method was undertaken.

The results confirmed previous investigation and if expectations are fulfilled a supply of natural gas easily available for both Regina and Saskatoon will be developed by the fall months, the company says, in its official statement.

A great deal of geological work has been done in this area, which has been favorably reported on by leading geologists, and the great development work is being undertaken as a result of a favorable report on the seismograph survey made last fall by Geophysical Service Corporation of Dallas, Texas, which is the same company that did the work for the Northern Company on the Twin River structure, which has just recently completed its well.

President of the Highwood Sarcee Oil is A. W. Dingman, the father of gas and oil development in the district of Calgary and a pioneer in Turner Valley, to whom much of the subsequent development is due. The company is strong financially and well able to carry out its undertakings.

Japan Needs Markets

More Than Territory

Chinese Trade Is Necessary To Support Growing Millions

Japan last year added more than a million to her population in the home islands. She now has as many people as Germany on a territory only five-sixths as large; and Germany is now the most crowded of nations. There is only one other big power that registers such annual gains, and that is Russia. There the annual increment is about 2,500,000 for a population two and a half times as large as Japan's. The latter has a death rate as high as birth, birth control in Japan is as yet unknown.

It does not follow that population pressure in Japan justifies recent methods in territorial expansion. Emigration is comparatively a trickle and cannot solve her problem. Her growing millions can be supported only by progressive industrialization and growing foreign markets. In this sense Japan needs the good-will and trade of the Chinese people more than she needs Chinese territory.

Idea Originated In Canada

Canadian National Steamships Offered Cut Rates To Newly Weds Before Mussolini

Premier Mussolini last year offered a ten per cent. reduction for honeymooners on Italian Airways but a few months before his cut-rate was introduced the Canadian National Steamships had come to the rescue of newlyweds in Canada, according to Thomas Cress, passenger manager. The company announced a fare reduction of ten per cent. available to all couples sailing within a week of their wedding day and the offer is in effect again this year.

Abolishing the Shame

For England and Wales the Minister of Health has launched a campaign to wipe out the shame in five years. In Scotland the Department of Health is at present working on a three-year program which is operating with great success. Scotland has outstripped England and Wales in alum clearance.

U. S. RECOVERY PROGRAM WINS WIDE APPROVAL

London, Eng.—Approval for President Roosevelt's recovery program was voiced in the House of Commons by spokesmen of the three principal political camps.

The debate, which turned upon the world economic conference upon the eve of indefinite adjournment of that gathering, drew from Neville Chamberlain, Chancellor of the Exchequer, the declaration that the pound sterling is an independent currency, linked neither to gold nor the U.S. dollar.

Independent speakers of the Laborite, Liberal and Conservative groups declared the United States is not to blame for lack of accomplishments by the economic parity.

"There was no basis on which President Roosevelt could stabilize the dollar with reference to the pound," charged the veteran Liberal chief, David Lloyd George, making one of his now rare appearances in the parliamentary discussions.

Asserting the economic conference is dead, Mr. Lloyd George asserted that "the prime minister is engaged in finding the best method of embalmment, it is as to keep the appearance of life after the spirit has departed."

Cheers greeted the statement from the Conservative member, Wardlaw Milne, it was impossible for the United States to enter an agreement to stabilize the U.S. dollar.

Many speakers referred to "the great experiment" now in progress in the United States. Mr. Lloyd George said:

"There are three experiments now proceeding, on the success or failure of which the whole outlook of the world depends—the Russian, the Italian and the American. The American is the most important."

"I hate to use the word revolution in referring to it (the American), but it is a complete transformation."

The debate was forced on the government in order to clear up its policies with regard to such problems as currency and public works.

Road To Recovery

Industrial Situation Is Showing Further Improvement

Ottawa, Ont.—Canada's industrial situation showed further marked improvement at the beginning of July. Increases in personnel reported to the Dominion Bureau of Statistics by 8,125 firms were greater than those indicated by the firms making returns for any previous July in any year since 1920.

Establishments reporting data had 778,148 persons on their staff on July 1, as compared with 742,750 on June 1. This increase caused the Bureau's index to rise by 3.8 points to 84.5 as compared with the average seasonal advance of about two points.

Visitor To Canada

British Free Trade Leader Coming To Conference At Banff

London, Eng.—Sir Herbert Samuel, leader of the Free Trade group in the House of Commons and former Home Secretary, will lead the British delegation to the conference on Pacific relations to be held at Banff, Alberta, this month, it was announced. Sir Herbert left for Canada July 28.

He will also attend a meeting of the Royal Institute of International Affairs to be held in Toronto, September 12. At this gathering it is planned to discuss some outstanding empire questions.

Visiting Peace River Country

Edmonton, Alberta.—Preparations for the visit of Lord and Lady Benborough to the Peace River country have now been completed. The governor-general's party will arrive in Edmonton Sunday, August 6. They will entrain Monday evening for the Peace River trip which will last five days. A holiday side trip to Jasper Park will follow.

W. N. U. 2005

High Commissioner

London Representative Has Not Standing Of Cabinet Minister

Ottawa, Ont.—Queries reaching Ottawa from British newspapers indicate that the question of the Canadian High Commissioner being a member of the Dominion Government is again under discussion in London. Hon. G. Howard Ferguson, High Commissioner in London, is a member of the Canadian Privy Council as was his predecessor, Hon. Peter Larkin. As such he may attend a cabinet meeting but evidently in some quarters the proposal being made that Canada's representative to the British Government should be a full fledged cabinet minister.

During the war Sir George Perley before he became high commissioner, represented Canada in London while a member of the Borden Government.

The argument has been advanced that a high commissioner could more effectively serve Canada if he had the authority of a member of the Dominion Government. Under the present arrangement, the high commissioner is responsible to the minister of external affairs, whereas if he were a cabinet minister he would be responsible to cabinet as are the holders of the other portfolios.

One suggestion made some time ago was that a member of the cabinet serve in London for two years and then be succeeded by another member, thereby always having a representative in close touch with Dominion affairs.

End Economic War

Expect Trade Barriers Between England and Ireland Will Be Removed

Dublin, Irish Free State.—The belief is growing that the economic war between the United Kingdom and the Irish Free State, which resulted from withholding by the Free State Government of land annuities amounting to \$15,000,000 a year, will be speedily ended.

"We are not anxious to maintain tariff barriers," Sean Lemass, Minister of Industry and Commerce, declared in the senate. "We remove the emergency duties now if Great Britain undertakes to remove her tariff duties within a reasonably short time."

Mr. Lemass added that if certain members of the United Kingdom government would "show a little sanity" there would be a speedy end to the dispute.

The minister's speech is generally regarded as a distinct advance and gesture to the United Kingdom.

Western Wheat Crop

Heat and Drought Spoils Excellent Prospects In June

Ottawa, Ont.—Continued uncertainty as to the prospects for crops on the prairie is noted in the ninth of a series of 15 weekly telegraphic reports on conditions in Manitoba, Saskatchewan and Alberta, published by the Dominion Bureau of Statistics.

Excellent wheat prospects in May were generally blighted in June by drought, and July brought a further decline, the report states.

The unsatisfactory conditions are regional, however, the report explains, and the effect on the whole wheat crop will depend upon the acreage affected.

Seizes Islands

Tokyo, Japan.—An investigation to determine whether Japan would be justified in contesting France's recently announced occupation of nine hitherto unoccupied coral islands in being conducted by the foreign office. The islands lie between the Philippines and French Indo-China at 11 degrees north and 113 east.

Edge Is Off Relief

Toronto, Ont.—The edge is off the relief problem. A large percentage of Ontario's unemployed have been absorbed," said Hon. J. D. Monteith, a statement here.

Thanksgiving Day

Ottawa, Ont.—Thanksgiving Day this year will be celebrated on the second Monday in October, as was the case last year, it was learned here on good authority.

JOURNALIST PASSES

Viscount Burnham, famous British journalist and former publisher of the London Daily Telegraph, passed away at the age of 71. For twelve years, 1910-1928, the distinguished newspaperman was president of the Empire Press Union.

Flight Postponed

Mollison's Plans For Further Flight Off For The Present

New York.—Captain James Mollison said the projected flight of himself and his wife, Amy Johnson, is definitely off for the time being.

"I'm not through flying," the Scotsman said as he lay in bed in his hotel recovering from injuries sustained when his plane crashed at Bridgeport, Conn., after a trans-Atlantic trip.

Although he made it plain that they flying plans for the immediate future have not been made, Mollison intimated he had in mind obtaining on his return to England, a plane similar to the "Seafarer," the plane in which the couple crashed.

Meanwhile it became known that the "Seafarer" is being prepared for shipment to England on the liner "American Express."

Unemployed Congress

National Meeting Of Workless To Be Held In Ottawa

Ottawa, Ont.—The city council has been asked to provide accommodation for some hundreds of delegates who plan to hold a national congress of the unemployed in Ottawa, Sept. 6 and 7. The secretary of the national committee of unemployed councils, H. Sula, Toronto, also asked that the city provide food for the delegates.

Last August a similar gathering of the unemployed was held here, with hundreds of unemployed men and women coming to the capital by hitch-hiking, riding freight trains, and on foot. Some rode freight trains all the way from the Pacific coast.

The forthcoming congress was called by a committee appointed at the gathering last August.

Would Ship Butter To New Zealand

Vernon, B.C.—The Okanagan Valley Co-operative Creamery would reverse the order of things and ship butter to New Zealand, taking in return lumber or fish. Directors of the company have petitioned the Minister of Trade and Commerce requesting him to try to arrange a shipment of Canadian butter to the antipodean dominion.

CANADA ISSUES SPECIAL GRAIN EXHIBITION STAMP

To commemorate the opening of the World's Grain Exhibition and Conference, at Regina this month the Canadian Post Office has issued a special set of stamps. Above we see a reproduction of a twenty cent stamp bearing the title "World's Grain Exhibition and Conference."

Viewed As Experiment

Believe Roosevelt Plan Would Not Be Success In Canada

Toronto, Ont.—Toronto business leaders said they did not believe an industrial recovery plan along lines of that initiated in the United States by President Roosevelt would succeed in Canada. The United States plan of raising pay and shortening working hours, they said, could not be regarded otherwise than as an experiment.

C. H. Carlisle, president of the Goodyear Tire and Rubber Company, said "I am not in favor of President Roosevelt's plan as a plan that would work out permanently. If it works at all, it is a sort of anaesthetic for a bad case."

C. L. Burton, president of the Robert Simpson Company, described the scheme as "dynamite." In his opinion, Mr. Burton said, "the less interference by the government with business the better for the wage-earner."

J. Allen Ross, president of the William Vignier Company, differed. He said he thought the Roosevelt plan had a good chance of success, but admitted "the industrial set-up of this country is different."

Improving Bay Railway

Work Being Done Between Mile 442 and Churchill

Churchill, Man.—Extensive improvements in the Hudson Bay Railway line are being made in this division in order to facilitate grain movements and industry in the far north.

A work train employing 80 men is located in the yards here. Seventy men are employed at the gravel pit five miles east of the harbor. Five train crews are operating between the pit and Mile 442, Hudson Bay Railway. The embankments on the right-of-way are being widened between that point and Churchill, B.C., lasting is also being carried out along the line. About 130 ballast cars are being used on this job.

An extension of truckage to facilitate movement of grain at the terminal elevator is being laid 1,600 feet beyond last year's limits.

One work train is making one trip per day to the muskeg camp at Mile 486 where moss is being delivered for the covering of the pipe line which leads from the reservoir east of the port to the townsite.

Herman Trelle Captures Prize

Takes First Place With Sample Of Reward Wheat

Regina, Sask.—Herman Trelle, champion wheat grower of Wembley, with his sample of Reward wheat, took first place and a prize of \$1,500, in the class of 10 bushels of hard red spring wheat at the World's Grain Show. Alberta growers occupied the first six places in this class, and a total of 12 prizes out of 25 offered. Prize money going to Alberta wheat-growers included a prize of \$2,000 for 10-bushel hard red wheat class totalled \$5,275, out of \$6,000.

Aged Couple

Mouche, Turkey.—Hashi Hashim and his wife, Hadji Haddide who say they are 128 and 124 years old respectively, have appeared in Mouche after migrating from their village of Mutki. They have 45 children, grandchildren, and great-grandchildren living.

PART PLAYED BY EMPIRE IN WORLD PARLEY

London, Eng.—"The British Commonwealth of Nations was one of the greatest powers participating in the World Economic Conference," the Prince of Wales declared in addressing delegates to the sixth biennial conference of the British Empire Service League at a banquet here.

"Because of our position we can never have any narrow, national character," he continued. "For one of the greatest powers in the world, to have no narrow, individualistic national character but yet be held by a great bond is a very great thing at present."

The Prince said that after ten years the British Empire Service League had justified its existence among ex-servicemen and among governments in all parts of the commonwealth of nations. All parts of the Empire had suffered severely during the last ten years. War veterans of the Empire had borne their burdens with great fortitude, he said, because they knew what service and sacrifice were and knew it was up to them to help others who had not been through the same grueling.

The heir to the throne read a telegram from the King wishing continued prosperity to the league.

"Danger clouds are showing in more than one quarter," declared Rt. Hon. Winston Churchill responding to a toast to the guests. "The glorious victory has not been followed by any slackening in the demands for exertion or any increase in the ease of the lives of our people, but we can feel a certain satisfaction at the position we hold today."

Crowned Wheat King

Freeland Wilford Of Staveland, Successful Mixer Farmer

Calgary, Alberta.—Freeland Wilford, crowned wheat king at Regina World's Grain Show, also is a prominent stockman of the Staveland, Alberta district. Freeland carries a fine herd of Tamworth hogs, a flock of Hampshire sheep, a herd of Hereford cattle and a number of purebred horses on his four sections of land.

In every sense of the word a successful mixed farmer, Wilford will receive a rousing welcome when he returns to Staveland with the wheat crown. Staveland residents while preparing for a great reception, told how Wilford and his wife had quietly prepared since the fall of 1932 for the Regina show.

In the daytime and under artificial light at night the couple examined bushel after bushel of Reward wheat until he found the sample that carried him to victory at the world's greatest grain exhibition.

Ruling In Marriage Case

Alberta Court Determines Provincial Laws Governing Youthful Contracts

Calgary, Alberta.—Alberta court of appeal has ruled any girl over 12 and any boy over 14 years of age may marry without their parents' consent as far as provincial laws are concerned, declaring such cases are exclusively under Dominion government control.

This judgment was handed down in Edmonton, Tuesday, during appeal court sittings and followed hearing of a case in which a mother attempting to have the marriage of her daughter annulled on the grounds both the daughter and youthful husband failed to obtain their parents' consent. The girl was 19 years of age and the boy 20.

The court held the marriage was valid in handing down judgment. A minority dissenting judgment was handed down by Mr. Justice Clarke.

Communists Arrested

Berlin, Germany.—The authorities announced that nation-wide police raids resulted in the arrest of many Communists and in the confiscation of large quantities of weapons, explosives, and subversive literature.

A Piece of Pie.

Some of these modern diet delusionists are claiming that the habit of eating pie is a pernicious one. They would have it barred from the daily cuisine as a menace to health. A drastic movement such as this would be little short of a national calamity.

There is probably no other article of diet which appears in such infinite variety and enjoys such a widespread popularity as pie. It has an old-fashioned honey appeal to the hearts (or rather stomachs) of millions of devoted devourers who would rise in open rebellion at any attack on its character or reputation.

It is an old reliable standby that has stood the test of time, the attacks of fanatics, and the forebodings of dyspeptics. Its interior contents are many and varied, but all are generally good, although some kinds have more ailments than others. Vegetables, cereals, fruits, berries, birds, fish, and wild and tame animals have all contributed to the many and mysterious compounds used in its interior upholstery. Millions of inventors are continually searching and experimenting for new ingredients and possibilities.

It can be obtained in the three standard and approved models of open-faced, closed and cross-hatched designs which have been approved by age and usage and are fittingly appropriate to certain species.

Pie can be eaten by people of all ages, of all races, of all colors. It is equally enjoyable hot, lukewarm, or cold, with or without music, waiters, lights, napery, table hardware or other impediments.

It is good when eaten alone, or in company with cheese, sauce, sugar, milk, and any kind of cream (whipped, calm or frozen).

It is without caste, social aspirations, or highbrow snobbery. It is usually paramount in the laborer's dinner pail, the fly-specked beaver, the railway lunch counter, the choicest and carry cafeterias, or the sacred purities of the most shamelessly expensive hyphenated hostelry. It can be eaten for all meals—breakfast, luncheon, dinner or midnight snack.

It is good at all hours, in all seasons, in all weathers, provided always that it be well and truly made: this is the main consideration. Beware of the base imitation, made from emulsified commercial mystery artfully concealed between layers of pallid linoleum that flaunts its brazen and spurious effrontery on an innocent clientele.

Field Days At Lacombe.

Below is a list of dates of field days to be held at the Dominion experimental station, Lacombe, during August:

August 11—Clydesdale Breeders' Field Day.

August 14—Cereal Crops Field Day and annual meeting of the Alberta branch, Canadian Seed Growers' association.

August 15—Cereal Crops Field Day and inspecting Searle Grain company plots.

August 17—General Field Day for Soldier Settlers.

For the field day on August 17 a general program is being prepared which will cover as fully as possible the most important features of experimental work which it is believed will be of service to the soldier settlers, many of whom are lacking in farm experience and need all the encouragement and inspiration which can be supplied.

JOSEPH BEST,
Secretary-Treasurer M. D. of Inga No. 520.

The Farm Woman, God-Remembered.

Once, 'twas said, the farmer's wife

Led so hard and drear a life,

Working early, working late;

Broken health her certain fate.

Nothing to relieve her lot—

She, the woman God forgot.

But some, in that bygone day,

Chose themselves a better way;

Work and play and trust in God

Brought results both deep and broad.

God remembered—Better health,

Better homes—a common wealth.

Now, in this our latest day,

Wealth on wings has flown away;

Poverty licks at the door;

Must love out the window so?

Trust in God! He'll not forget!

Thru life's maze he'll lead us yet.

God forgotten! Can it be

When he gives so much to me?

God remembered, rather say,

Crowded with blessings every day.

Simple pleasures, always best,

Come to us. Forget the rest.

Greeted in my waking hours

By song bird and fragrant flowers,

Charmed by pictures changed each day

From my windows spread away.

Bird song, flowers, skies, field, trees,

God remembers me with these.

Morning hours that swiftly fly

Some new zest each day supply:

Chickens calling for their food,

Garden pining to be hoed.

This is how God thinks of me,

Thus I'd praise him joyfully.

Horns are blowing; noon is here;

Men come in for rest and cheer.

"That fried chicken is just great."

Just on a piece left on the plate,

"Where's a little tin pail, Fraw?"

Strawberries are plenty now."

Dishes washed, things rubbed a bit,

Everything to look nice and fit.

Some old friend on some new quest

Dropping in, we both are best:

Pattens, books, and bits of news,

Crops and conference, Great men's views.

Eve has come with twilight star,

Music mellowed from afar;

Birds and beasts in quiet rest;

Of all times the eve is best.

I thank thee God on bended knee

The way thou hast remembered me.

—C. D., Member Holborn U. F. W. A.

SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during class and when she is supposed to be drawing a Greek urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder.

(Now go on with the story)

CHAPTER II.

"Miss Hoyt," a man's vibrant voice pleaded, "may I apologize? I'm sorry if I offended you in class today."

Camilla dabbed frantically at her tearful eyes with a square of bright linen, then raised her head reluctantly. She could not meet Peter's eyes.

"Well, if you think I'm crying about that," she finally managed in a husky voice that stung with sarcasm, "you need not trouble to apologize. You presume a lot to think I even remembered it, don't you?"

"Oh—I'm sorry," he hesitated. "But if you are in trouble—that is—may I help you?"

To his amazement and relief, she laughed suddenly and looked up at his face as he bent over her anxiously. Her tear-wet eyes dazzled him, wide and shining like a child's and the tumbled black hair was like a cloud around her laughing face where the sun had just appeared.

suggested, with a roguish tilt of her chin.

Peter chuckled with relief. "That's better," he declared. "Whose head were you sketching—the prof's?"

"No—yours."

"Mine?"

"Yes. I think it is a beautiful head and I couldn't resist sketching it. Besides, it was right in the way so I couldn't see the old study-object, anyway."

"I'm sorry. Why didn't you tell me—?"

"Because I didn't care about sketching still-life, anyway. I much prefer living models."

"You'll get that next year."

"There'll be no next year here. I'm not studying to be a famous artist with immortal ambitions and all that."

"I didn't suppose you were," he admitted, suddenly more aloof. "The idea that anyone could be serious about ambition probably amuses you."

"Dead serious!" Peter declared.

She hesitated a moment before replying thoughtfully. "Not at all. It interests me, very much." Her earnestness was almost reassuring.

"And you are serious, aren't you?" "Dead serious!" Peter declared. "Why, I—," he hesitated, then changed the subject abruptly. "But I'm just as serious about something else that I'd rather talk to you about, but don't laugh at me even if you do refuse me. Will you let me entertain you some evening?"

her and actually seemed to be interested. She would wait, she resolved, until she knew him much better, to tell him about herself. By that time, it might just be possible that he would not be so frightened away even by her confession.

She said casually, "well — 'Too Many Girls' is playing at the Majestic. You may just be lucky enough to get tickets yet for tonight. And there's the Maddox club for supper, if you prefer famous food and hot music to hot food and famous music."

Peter stood up to cover his confusion. Both the food and the music were of minor importance to him. But if those expensive items were the price tags for Camilla's company, he would have to meet them, somehow. "Fine! I'll run along now and phone for reservations," he attempted elaborate "angroid." "Shall I call for you at eight?"

"You know where I live?" "Who doesn't know? Sure, I'll be seen' you then."

He saluted briefly, turned into the parkway and strode away. But his smile changed to an anxious frown as soon as he was out of Camilla's sight. Orchestra seats at the Majestic and supper at the Maddox club, if he preferred famous food and hot music. He did, if he could afford a preference. But he couldn't. Such an evening's expenditure covered Peter's allowance and expenses for a week.

What to do, now? Hadn't he leaped into a devil of a mess, just such as he had been forcing himself to avoid for two months? Didn't he, Peter Anson, making his own way to a career, know better than to get mixed up with snooty girls like Camilla Hoyt, whom it cost a fellow a fortune to entertain? He did. Then, why hadn't he watched his step? Well — what were you going to do about it when you discovered that Camilla Hoyt was the most adorable and desirable creature in the world and you were mad to be near her, at the same time you feared her?

Professor Drake had precipitated the avalanche upon him; his coming upon her in the park last night had engulfed him. And here he was, scarcely daring to breathe and wondering how to escape from his new dilemma.

He shoved his hand into his trouser pocket, knowing that it would encounter only a few pieces of change. He poked his finger into a few pocket, knowing that a lone five-spot was folded there. It represented his week's allowance for food. His thoughts leaped fearfully to a small deposit in his name at the bank, put there thriftily and with sacrifice, to meet emergencies. Peter smiled ruefully. Was this an emergency? It was, and it wasn't! If he could bring his conscience to admit the first thought and deny the second—

By eight o'clock, he had soothed his conscience, withdrawn half of his emergency fund — he had pledged himself to return at least half of it to the bank the following day, but he had to flash a roll, didn't he? — rented a tuxedo and a taxi-cab, and was ringing the doorknob at the imposing Hoyt mansion across the park from the art school.

A man in livery opened the door and scrutinized Peter with practiced caution.

(To Be Continued.)

"Miracle Fountain" Still Flows

Lightning Brought Water To Georgia Prisoners 70 Years Ago

The "miracle fountain" of Andersonville, Georgia, is still flowing. 70 years after lightning brought water to the wilderness in time to save a multitude of federal prisoners, dying in a hostile land. There is a monument there now, on the scene of American civil war strife. It's a national shrine.

More than 12,000 Unionists died at Andersonville, where there was a stockade in which 45,000, many of them wounded, were herded.

Sanitation was the prison's greatest problem—that and the prisoners who looted and slew their comrades. The scarce water supply at Andersonville was contaminated.

August and a relentless Georgia sun scorched prisoners and their Confederate guards alike. Some prayed; some sang. A black cloud dropped low and a bolt of lightning crashed over the stockade and tore away the earth almost in the centre of the prison yard. Water gushed from the hole—enough for all. Years after the war somebody remembered the spring and a monument grew around it. The water still flows between the graves and keeps rich green the grass on hero-mounds.

THE RHYMIST

By Alice Michalson

THE YEAR

I thrilled with joy in May,
When all the land was gay.
When all the multitude
Of birds in field and wood
Lifted their songs in glee
From hedgerow and from tree!
When every road up-hill
Lured me to journey still,
To climb each swelling crest,
Better to view east, west,
The sun-sweet world, so fair,
No sorrow could be there!

But springtime could not stay,
Nor the child-heart of May.
Though life's summer-time
The deeper notes must chime,
They sound a braver tune,
Ringing through golden June!

And mellow in the fall,
The songs of living call,
Richer for memory
Of joys that used to be.
Each season as it goes
To some sweet measure flows;
Winter, though grim and chill,
May move to music still!

Arranging Huge Air Derby

Race From England To Australia Starts In October, 1934

One of the events of the Victorian centenary celebrations is a great air race from England to Melbourne. Conditions have just been issued.

Cash prizes totalling \$15,000 and a gold cup valued at \$500, are offered for championship and handicap events, and each pilot who completes the course within 16 days will receive a gold medalion. The races will start on October 20, 1934, from several aerodromes in England, and will finish at Pennington.

Any number of machines may be entered by one competitor, and the same machine may be entered for both races, but only one amount of prize money will be payable in respect of each machine.

There is no limit to the number of members of crews, including passengers. Each machine must carry sufficient food and water to maintain life for three days, approved flotation gear for the pilot and every member of the crew, and not fewer than six smoke signals.

Had Good Reason

Two men who had attended the village church were discussing the service.

"The vicar certainly preached a wonderfully strong sermon on vanity and extravagance," said one.

"Yes; and his own wife sitting right in front of him, wearing her new dress and new hat," put in the other.

"Oh," said the first, "that explains it! I wondered why he was so worked up."

Less than one-twentieth of the people in Britain now pay income taxes.

Argentina is considering the creation of a national grain commission.

Little Helps For This Week

"He that is faithful in that which is least is faithful also in much." — Luke 16:10.

The trivial round, the common task, would furnish all we ought to ask; Room to duty ourselves; a road To bring us daily nearer God.

— J. Keble.

Exactness in little duties is a wonderful source of cheerfulness. We are too fond of our own will. We want to be doing what we think is the right thing; but the great point is to do small things when called to them in a right spirit.—R. Cecil.

It is not on great occasions only that we are required to be faithful to the will of God; occasions constantly occur, and we would be surprised to perceive how much our spiritual advancement depends on small obediences. The unremitting retention of simple and high sentiments in any duty is hardening the character to that temper which will work with honor under all conditions.—R. W. Emerson.

Caring For Cut Flowers

Many Ways Of Keeping Blooms Fresh For Days

Everyone knows the old tip of putting an aspirin tablet in the water as a pick-me-up. But do you realize that the flowers must be given fresh water after an hour or so, or the drug may have the opposite effect? Another remedy for flowers that have been out of water for some time is to split the stems, plunge them into a jar containing two or three inches of hot water, and keep them in the dark for an hour or two. But this will be useless unless you cut off the dead pieces of stem before putting the flowers in the water. Tulips that bend over with the weight of their heads are usually treated by wrapping in stiff paper. But do you know that you can stiffen the drooping stems with starch? Put a small piece in the water and watch the result.

An Egyptian Pooh-Bah

Professor Finds Grave Of "First Man Under the King"

Professor Selim Hassan, working on behalf of the Egyptian University, has discovered in the course of his excavations of the so-called Fourth Pyramid the grave of a very important Pooh-Bah of the Fourth Dynasty. Sclae in the tomb describe him as Director of Finance, Keeper of the King's Food, Great Priest, Judge and Governor, District Director, and First Man under the King. Jar, vases and other utensils to the number of sixty were found in the tomb, many of them being of beautifully polished copper. Round the neck of the Pooh-Bah was a thin gold thread, while on his left forearm he wore a piece of turquoise and a bracelet of solid gold.

Saskatchewan is recognized leader among the provinces of Canada in social and public health legislation.

The modern girl screams to wear her heart upon her sleeve. In fact, she often screams to wear a sleeve.

SIMPLY WORN OUT?

Take Lydia E. Pinkham's Vegetable Compound

Can anything be more wearing for women than the constant strain of household duties? You have no time to be sick — you are tired all the time — yet cannot stop. There comes a time when something must be done and you find yourself simply worn out.

Lydia E. Pinkham's Vegetable Compound will help you. Its tonic action will give you strength and will make your daily tasks seem easier to you.

At out of every ten who use it, eight say that they are benefited by this medicine. Today . . . and watch the results.

W. N. U. 2005

A man in livery opened the door and scrutinized him.

"Well, my trouble isn't sketching still-life objects," she said, "but don't worry about me. I'm all right. Just the blues, I guess."

His eyes twinkled with a spontaneous humor and he sat down on the bench beside her. "What kind of blues — Limehouse, St. Louis or any particular brand? I might know the cure."

"Just the blackie-blues. Now there's an idea for a new blues song, if your ambitious to write a radio hit."

He shook his head, smiling. "I need all my inspiration for flag flutters."

"Oh," her voice held awe. "You're a sculptor."

"Well, that's what I want to be. It happens that I've studied with Professor Drake before, and am finishing next month. I only went into this sketch class for critical training."

"No wonder you laugh at us."

"Not at all. You have me wrong, Miss Hoyt. I wasn't laughing at you, really."

"Laughing with me, then?" she

He misinterpreted her quick look of surprise and her hesitation. "Now I am presuming a lot, I know."

"No — why, no — of course not. Please don't think I—"

His chance, perhaps the only chance he would have to talk with her. He interrupted desperately. "I promise to think nothing, if you will let me see you again—then with more courage, 'how about this evening?'"

"Why the hurry, all of a sudden?" she bantered.

"I've just discovered how much I've wanted to see you all the time."

She laughed with confusion. "This evening suits me."

"Cheek," laughed Peter, scarcely believing that it could be true at last that he was making a date with Camilla Hoyt. "Where shall we go?"

he held his breath.

"Why — anywhere you wish," vaguely.

"I'd rather you would say. I don't know you very well, and what you like to do. I want to take you wherever you like most to go."

Camilla reflected briefly. She was weary of the round of theatres, night clubs and parties frequented by her crowd, and would like to suggest some very simple or inexpensive pleasure. But she didn't dare. She might frighten him away by being plebeian, which she delighted to do with some men of her acquaintance. But she had no wish to frighten Peter Anson away, now that he was so near

The Chicken of Today.

The old red hen "ain't what she used to be," the head of the poultry department of the Massachusetts States College said recently. The chicken of today is forced into early maturity and is kept operating at a speed which would have killed her 1900 ancestor. In the old days a chicken was born and a few days later she was out in the yard tugging at worms. Now many of the incubator hatched chicks never get out of a building until their laying days are over. Back a few years ago the ordinary hen started laying at 8 to 10 months, but now the poultryman has hastened things along so that expects them to be laying at 5 to 7 months.

NOTICE!

WARDEN SCHOOL DISTRICT.

NOTICE is given that the Secretary, Mrs W. T. Propp, will be at Warden School house on SAT., AUG. 5, for the purpose of receiving taxes.

Wm. Miller Declared Dead.

On an application made by his wife Minnie M. Miller, Wm Miller was declared dead by Chief Justice Simmons of the Supreme court trial division in an Order issued Monday. The application was substantiated by an affidavit stating that Miller was last heard of shortly after he left Stony Plain in 1926.

Miller will be remembered as having come to Stony Plain with his family in the summer of 1926 and taking up his residence in the Bob Stoker house on First St. Following this, Miller purchased a house and lot on Fourth St. west. The purpose of the Order declaring Miller dead is to allow a transfer of this house and lot in Stony Plain to Mrs Miller's name. Geo J Bryan acted as counsel for Mrs Miller.

Save One for Her.

"My mission in life is to save young men," remarked an evangelist, when introduced to an old maid. "Well, I wish you'd save one for me," the old maid replied.

Our New Butcher.

Mr Andy Pruden, the butcher who had been operating a branch shop here for the past year, has pulled out, and will confine his operations in future to his shop in the City. His layout here has been taken over by Mr Hilding Bjord, an experienced butcher who guarantees satisfaction with every purchase made at his shop.

The Big Storm

Thursday evening last this district was visited by a most severe electrical and rain storm. The storm followed 4 days of excessive heat, the temperature rising at times to over 90 in the shade.

The storm had come down from the west, and is thought to have started in the vicinity of Gairford, where it did considerable damage to automobiles, windows and roofs of buildings; one report saying "the hailstones were the size of baseballs, some going right thru the tops of automobiles and badly denting fenders."

One favorable thing in connection with the storm was the narrow width to which the hail damage was confined; farmers to the south of town getting no hail and very little rain. The crop damage seems to have been confined to the grain fields along the Base-line.

There is said to have been very little hail insurance contracted for by the local farmers.

Two Liberty M.D. Councilors Are Fined.

"As far as can be learned," says The Leduc Representative, "the charges heard last week in the local police court by Magistrate Young against Councilor Kozioi and ex-Councilor Cook of the Municipal District of Liberty, for over-spending the amounts of their appropriations, were the first of their kind to come up in the province.

"There was absolutely no suggestion of fraud in the case of either Councilor. The charge was simply one of spending in excess of the amounts authorized by the Council. This sort of over spending is nothing new for a municipal district. It has probably occurred at some time or other in the majority of the municipal districts of the province, but in this case, the over-expenditures were not ratified by the whole council, and the Magistrate had no recourse under the Act but to impose a fine, which was \$10, the minimum.

"There is no doubt that the result in this case will have a far-reaching effect in keeping expenditures in the various divisions within the amounts of appropriations, and will be the means of helping Councilors in their efforts to accomplish this.

"The Councilor who over-expend is not always to blame. In those times ratepayers are anxious to secure work from the Municipality, and it is in trying to please too many of them that the Councilor frequently oversteps the mark.

"The charges in these cases were laid by Messrs Flater, Grossel, Larson and Geo. Foster, who had secured C. H. Russell of Wetaskiwin, to conduct their end of it, while Mr Speers of Edmonton appeared for the defence."

Stony Plain and District

Mr and Mrs Geo J Bryan have as guests this week Mrs Bryan's parents, Mr and Mrs J G Munro, of Medicine Hat.

Mr Philip Eberhardt of Golden Spike and Rev Emil Eberhardt have gone to St Paul, Minn., where they will attend the golden wedding anniversary of their sister.

Reginald Pugh and Allin Percy Pugh, Jasper, are visiting in Stony with Mr T J Hardwick.

The inspector from the Radio branch, Dept. of Marine, gave local receiving sets the once over on Tuesday.

Mrs P Anderson returned on Saturday morning from a motor trip to Banff.

Miss Elsie Schpengler, who had been visiting here with Mr Ph Fuhr, has returned to her home in Lethbridge.

Dr and Mrs Outway left Monday by train for Dominion City, Man.

Local subscribers to Edmonton's two dailies are having their papers delivered to them by new hands, the two regulars having gone on vacation.

We hear the local ball team took along with them on their trip this week their favorite umpire, Fels Naptha.

Remember the Community Dance at the Holborn hall, Friday Evg. Aug. 11. Barth's orchestra.

BUTTER AND EGGS WANTED at The Royal Cafe.

Building Fishing Craft.

Operations are now proceeding on a line of boats at Elmer Anderson's shipyard on 2d St. He and the staff are working on an order of fishing Craft for the new summer resort on Lake Nine, being run by Mr. Eddie Hubbel.

Wheat Pool Payments.

Premier Brownlee is quoted as expressing the opinion that another distribution of profits may be made to Alberta wheat pool members, on past transactions. "If present price levels of wheat continue there is a possibility that a further distribution may be made to pool members on the 1930 crop, which has been handled by John I McFarland."

The records show that 60c was the maximum paid for that crop; and other payments ranged down to 55c and 50c.

The Stony Plain Sun

starts this week on its fourteenth year of continuous publication in Stony Plain. The Editor wishes to express his gratitude to those patrons who have made this possible.

Spruce Grove News

His friends and neighbors are congratulating Mr Henry Schellenberger on his winning second prize at the World's Grain Show at Regina for his exhibit of 2-rowed barley. The award carries a cash prize of \$500. Mr Schellenberger says he has been buying and using registered seed as a regular practice.

The pilgrimage to the shrine at Lac Ste Anne proved to be quite an attraction to a number from this district. On Thursday last, who motored up to be present at the impressive services. The day before was the time set for Indians to attend the celebration.

The storm on Thurs. last brought the rain which was badly needed on some of the farms to the north, while a report of the storm in the Edmonton Journal places the hail damage at around 5 p.c. on the average. A more recent survey shows that a few of the crops were beat down so badly the farmers were considering plowing the grain under.

The threatening weather of Sunday afternoon did not deter a goodly number of celebrants from attending Missionfest services at Peace Lutheran church, here. Rev H Kuring, the pastor, was in charge. He was assisted by Rev B F Behrends, pastor of the Lutheran church, Beaver Hills.

The recent heavy rains have made the travelling on the side roads rather difficult. Several being closed altogether for autos.

Fertilizers Prove Good.

A fairly large gathering attended the annual university experimental plots filed day down at Breton, Alta., last week, when some fine plots were inspected. Results indicated the extra growth attained where commercial fertilizers were applied. Fine plots of grain and legumes were in evidence. Professor F A Wyatt and Dr. A. Leheigh, conducting the review for the soils department, and Dr T Mather, representing Consolidated Smelters, attended. Farmers expressed their conviction that the supervisors who carry on this work are rendering invaluable services.

Peck's CAPS

—are made for those men and young men who appreciate the little touch of refinement in head dress.
The most comfortable and most serviceable caps made for golf, motoring and all outing occasions, as well as street wear.

T. J. Hardwick, Agent.

YOU CANNOT AFFORD TO BE WITHOUT YOUR LOCAL PAPER—SUBSCRIBE NOW AND KEEP PAID UP.

Farm Lands Wanted For Immediate Possession.

Farmers moving from the drought districts are seeking farm locations where they may engage in mixed farming. They wish to lease, or may purchase if terms reasonable. Those desiring to list properties are requested to forward full particulars, including location, description of land, improvements, etc., to

Department of Agriculture, Edmonton.
